

Course Code	: 2304CS301	Date	: 18-10-2024
Course Name	: Computer Network	Duration	: 150 Minutes
		Total Marks	: 70

Instructions:

1. Attempt all the questions.
2. Figures to the right indicates maximum marks.
3. Make suitable assumptions wherever necessary.

Q.1 (A) If a network experiences a packet loss rate of 5% and 1500 packets are transmitted, Show how many packets are lost? **4**

(B) Compare LAN, MAN and WAN. **3**

OR

Write down and discuss Applications of Computer Network.

(C) Explain Delay with suitable example. **7**

OR

Define Topology. Explain any three topologies with example.

Q.2 (A) List out and explain propagation modes of wireless media. **4**

(B) Describe Twisted-Pair cable with its type. **3**

OR

Compare STP and UTP.

(C) Explain Bluetooth Technology with proper diagram. **7**

OR

Compare Terrestrial Microwave and Satellite Microwave transmission.

Q.3 (A) Discuss Connation-Oriented v/s Connectionless approach. **4**

(B) Draw a neat and clean diagram of OSI reference model. **3**

OR

Write down the functions of Session layer and Presentation layer.

(C) Explain TCP/IP model with suitable figure. **7**

OR

Compare OSI and TCP/IP model.

- Q.4** **(A)** Write a short note on Print Server. **4**
 (B) Compare DSL v/s ADSL Modem. **3**

OR

Explain Router in detail.

- (C)** What is dedicated server? Discuss its advantages and disadvantages. **7**

OR

List out types of servers and explain in brief.

- Q.5** **(A)** Calculate subnets of IP address 201.22.6.0 into 30 hosts in each subnet. **4**
 (B) Determine the number of host addresses, network address, and the broadcast address of the given IP address 10.200.240.1 **3**

OR

Determine the number of addresses in the block, the first address, and the last address of the given IP address 185.28.17.1

- (C)** Describe SMTP with proper example. **7**

OR

Explain Persistent and Non-Persistent HTTP.
