

Course Code	: 2304CS301	Date	: 06-05-2025
Course Name	: Computer Network	Duration	: 150 Minutes
		Total Marks	: 70

Instructions:

1. Attempt all the questions.
2. Figures to the right indicates maximum marks.
3. Make suitable assumptions wherever necessary.

- Q.1 (A)** List the applications and advantages of computer network. **4**
- (B)** Write a short note on Bus topology. **3**

OR

Write a short note on Star topology.

- (C)** Describe Ring topology with a suitable diagram. Also, list and explain advantages and disadvantages of ring topology. **7**

OR

Describe Delay, Loss & Throughput with a suitable example.

- Q.2 (A)** State the difference between STP and UTP. **4**
- (B)** Write a detailed note on Radio waves. **3**

OR

Write a detailed note on Microwaves.

- (C)** Explain fiber optic cable with suitable figure, along with its advantages and disadvantages. **7**

OR

Describe Piconet and Scatternet with a suitable example.

- Q.3 (A)** Write a short note on communication modes. **4**
- (B)** Briefly discuss the circuit the switching technique. **3**

OR

Briefly discuss the packet switching technique.

- (C)** Explain the OSI model with a suitable figure. **7**

OR

Explain the TCP/IP model with a suitable figure.

- Q.4 (A)** Write a short note on a Repeater. **4**
- (B)** Explain Print Server with a suitable figure. **3**

OR

Explain Mail Server with a suitable figure.

- (C)** Discuss the Hub networking device, including its types. **7**

OR

Describe Switch networking device, including its types.

- Q.5 (A)** Write a short note on WWW (World Wide Web). **4**
- (B)** Identify the class of the following IP addresses: **3**
- i. 195.172.10.1
 - ii. 14.23.120.8
 - iii. 134.11.78.56

OR

Identify the class of the following IP addresses:

- i. 229.0.0.10
- ii. 185.23.12.8
- iii. 241.11.78.56

- (C)** Explain Classful Addressing of IP with a proper example. **7**

OR

Explain the IPv4 Header Format with a suitable diagram.
