

Course Code	: 2304CS302	Date	: 13-05-2025
Course Name	: Object Oriented Programming using Java	Duration	: 150 Minutes
		Total Marks	: 70

Instructions:

1. Attempt all the questions.
2. Figures to the right indicates maximum marks.
3. Make suitable assumptions wherever necessary.

- Q.1 (A)** Describe command line argument in java. **4**
- (B)** Write short note on byte code in java. **3**

OR

Describe role of JDK and JVM.

- (C)** Explain all java features. **7**

OR

Describe operator precedence in java with suitable example.

- Q.2 (A)** What is array? How array member can be initialized and accessed using loop. **4**
- (B)** Demonstrate switch-case statement with suitable example. **3**

OR

Demonstrate two-dimensional array with suitable example.

- (C)** Write a java program to find the maximum number from the given three number using if-else statement. **7**

OR

Write a java program to print the factorial of given number.

- Q.3 (A)** What is class and object? **4**
- (B)** Demonstrate String class with example **3**

OR

Demonstrate StringBuffer class with example.

- (C)** List and explain all the OOPs concepts. **7**

OR

[1] Explain use of Wrapper class.

[2] Describe the static nested class.

- | | | | |
|------------|------------|--|----------|
| Q.4 | (A) | Explain use of abstract class in java. | 4 |
| | (B) | Demonstrate function overloading | 3 |

OR

Demonstrate function overriding

- (C)** Demonstrate all use of final and this keyword with example. **7**

OR

Demonstrate all use of super and static keyword with example.

- | | | | |
|------------|------------|--|----------|
| Q.5 | (A) | Explain access specifiers in java. | 4 |
| | (B) | Write a java program to read data from a file and display it on console. | 3 |

OR

Write a java program to write data to a file using FileWriter class.

- (c)** What is exception? what is the need of exception handling mechanism? **7**
Implement exception handling mechanism with suitable example.

OR

Define custom exception. Write a java program to demonstrate user defined exception using throw keyword.
