|--------------------|------------------------------------------|--------------------|---------------|
| <b>Course Code</b> | : 2304CS302                              | <b>Date</b>        | : 01-05-2026  |
| <b>Course Name</b> | : Object Oriented Programming using Java | <b>Duration</b>    | : 150 Minutes |
|                    |                                          | <b>Total Marks</b> | : 70          |

**Instructions:**

1. Attempt all the questions.
2. Figures to the right indicates maximum marks.
3. Make suitable assumptions wherever necessary.

- Q.1**    **(A)**    Write a note on evaluation of java and features of java. **4**
- (B)**    Write basic structure of java program. **3**

**OR**

Write a note on identifiers.

- (C)**    List all the operators and explain any 3 of them. **7**

**OR**

Explain operator precedence and associativity.

- Q.2**    **(A)**    List all the control statement and explain with example. **4**
- (B)**    Explain continue statement. **3**

**OR**

Explain break statement.

- (C)**    WAP to explain all the looping statement. **7**

**OR**

Explain function in java. Explain all the types of user defined functions with example.

- Q.3**    **(A)**    Write difference between POP vs OOP. **4**
- (B)**    Explain wrapper classed in Java. **3**

**OR**

Explain inner classes in java.

- (C)**    Explain classes and object with suitable example. **7**

**OR**

List and explain all the OOPS concept.

- |            |            |                                                                      |          |
|------------|------------|----------------------------------------------------------------------|----------|
| <b>Q.4</b> | <b>(A)</b> | Write a difference between method overloading and method overriding. | <b>4</b> |
|            | <b>(B)</b> | Explain this keyword.                                                | <b>3</b> |

**OR**

Explain static keyword.

- (C)** Implement a program to explain constructor and constructor overloading. **7**

**OR**

Explain dynamic method dispatch with example.

- |            |            |                                                             |          |
|------------|------------|-------------------------------------------------------------|----------|
| <b>Q.5</b> | <b>(A)</b> | Define Package along with how to create and access package. | <b>4</b> |
|            | <b>(B)</b> | Explain throw keyword.                                      | <b>3</b> |

**OR**

Explain throws keyword.

- (c)** Write a demo program to explain character stream classes. **7**

**OR**

Write a demo program to explain exception handling.

**\*\*\***
