

Course Code	: 2304CS304	Date	: 23-10-2024
Course Name	: Software Engineering	Duration	: 150 Minutes
		Total Marks	: 70

Instructions:

1. Attempt all the questions.
2. Figures to the right indicates maximum marks.
3. Make suitable assumptions wherever necessary.

- Q.1 (A)** Define the terms: (1) software (2) scrum backlog (3) activity (4) sprint. **4**
- (B)** Write customer myths in brief. **3**

OR

Write developer's myths in brief.

- (C)** List six umbrella activities. Explain any *three* from it. **7**

OR

Explain Waterfall process model with proper diagram.

- Q.2 (A)** Prepare Use Case diagram for Library Management System. **4**
- (B)** Describe the characteristics of good SRS document. **3**

OR

Compare functional and non-functional requirements.

- (C)** List all the phases of requirement engineering. Explain any *three* of it. **7**

OR

Explain various ways to collect requirements.

- Q.3 (A)** Explain software design and list characteristics of good design. **4**
- (B)** List various architectural patterns. Explain any *one* of them. **3**

OR

Explain function-oriented design.

- (C)** Explain FURPS quality attributes. **7**

OR

Explain cohesion and coupling in detail.

- | | | | |
|------------|------------|---|----------|
| Q.4 | (A) | Explain unit testing and validation testing. | 4 |
| | (B) | Explain various coding standard and guidelines. | 3 |

OR

Explain alpha and beta testing methods.

- (C)** Explain unit testing, integration testing, and acceptance testing. **7**

OR

Explain black box testing with its advantages.

- | | | | |
|------------|------------|---|----------|
| Q.5 | (A) | <i>Explain the terms:</i> fuzzy logic sizing and function point sizing. | 4 |
| | (B) | Explain the steps involved in problem-based estimation. | 3 |

OR

Explain various ways to track a project schedule.

- (c)** Explain RMMM. **7**

OR

Explain Function Point Metrics.
