

Course Code	: 2304CS304	Date	: 14-10-2025
Course Name	: Software Engineering	Duration	: 150 Minutes
		Total Marks	: 70

Instructions:

1. Attempt all the questions.
2. Figures to the right indicates maximum marks.
3. Make suitable assumptions wherever necessary.

- Q.1 (A)** Explain Umbrella Activities. **4**
- (B)** Explain Characteristics of Software. **3**

OR

Explain Agile Manifesto in detail.

- (C)** Explain Linear Sequential Model in detail with advantages and disadvantages. **7**

OR

Explain Evolutionary Model in detail.

- Q.2 (A)** Prepare Use Case Diagram of College Management System. **4**
- (B)** Prepare book issue Activity Diagram. **3**

OR

Prepare State diagram of Student in College Management System.

- (C)** Explain Functional Requirements and Non-Functional Requirements with Example. **7**

OR

Explain Characteristics of Software Requirement Specification(SRS).

- Q.3 (A)** Explain Design Principal in software engineering Design. **4**
- (B)** Define cohesion in software design. List the different types of cohesion. **3**

OR

Define coupling in software design. List the different types of coupling.

- (C)** Explain different Architecture Design in detail. **7**

OR

Explain golden rules of User Interface Design.

- | | | | |
|------------|------------|--|----------|
| Q.4 | (A) | Define coding standards. Why are they important in software development? | 4 |
| | (B) | Differentiate between code review and software testing. | 3 |

OR

Compare white-box testing and black-box testing with examples.

- (c)** Describe the process of code review. What roles and responsibilities are involved? **7**

OR

Explain different testing strategies in detail.

- | | | | |
|------------|------------|---|----------|
| Q.5 | (A) | Write a Responsibility of Software Project Manager. | 4 |
| | (B) | Explain Software Project Scheduling & Tracking in detail. | 3 |

OR

Explain function point estimation technique in detail.

- (c)** Explain COCOMO model. **7**

OR

Explain different approach of Risk in detail.
